Vedi Side Table

Product Overview:

Fixed-height visitor table for the patient room family zone.

Order number: R10-19-S100033-Kxxx (The final three digits identify the finish color.)

Overall height: 25.80 in.

Tabletop (W × D): 14.00 in. × 19.50 in.

Base footprint (W × D): 14.50 in. × 19.00 in.

Product weight: 29 lbs.

Working load capacity: 25 lbs.

Placement and Use

Place the table on a level floor with all glides in contact. Keep the tabletop load within 25 lb. Do not sit, stand, or lean on the table or use it for support. Clear the tabletop before moving the table.

Product Care and Disinfection

Clean with a damp cloth or mild detergent solution. MedViron products can withstand a wide range of hospital cleaners and disinfectants. When using any of these products, read and follow the manufactures directions carefully. Do not use abrasive or solvent cleaner. A CDC recommended chlorinated bleach solution of 5.25% -6.15% sodium hypochlorite (i.e., household bleach) diluted in water at 1:100 also can be used. **After cleaning, it is important that the side table is rinsed with warm water using a clean damp cloth and then wiped with a clean dry cloth to remove any moisture.**

Inspection and Service

Check for wobble, loose components, damaged surfaces, or missing glides. If the table is unstable or damaged, take it out of use and contact medViron Customer Service. Have the order number available if known.
