

MEDVIRON®

Testimonial

After an extensive remodel of a large Childbirth center, our unit needed new bassinets, delivery tables, overbed tables, and computer carts to hold fetal monitors and a dual monitor screen. I evaluated multiple products from different vendors and did in-hospital trials of all major brands. The brand that significantly stood out above its competitors was medViron. The quality of construction, easy mobility, and beautiful design made medViron the clear favorite among our staff. It has now been over 3 years that we have been using the above products on our unit. All items have surpassed my expectations. There is not a single chip in any item, and the clear inserts in the bassinets are all intact. The carts have no dents or dings, and every item still looks brand new. I do not hesitate to continue to recommend this product to any facility.

Environmental Product Summary

39" Overbed Table

Material Content by Weight

- Aluminum (2 column parts)
- Steel (base + plate)
- MDF
- Misc (KYDEX, spring, casters, etc)

MedViron's 39" Overbed Table's proven durability leads to reduced energy usage and reduced logistics costs for the healthcare facility as the tables are replaced less frequently. Longer product lifespans mean fewer healthcare products ending up in landfills.

The 39" Overbed Table utilizes KYDEX® 3D laminate, which is 4x thicker than rigid thermofilm, giving it superior impact, strength and durability. KYDEX is certified GREENGUARD® Gold for indoor air quality.

Recycled Content:

The MDF used in our overbed table tops contains 100% preconsumer recycled content.

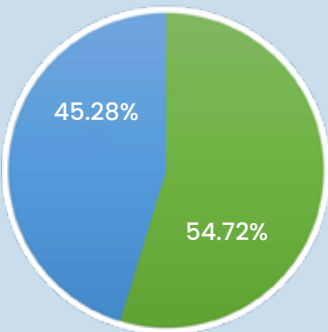

MedViron overbed table's steel components contain up to 30% recycled content, of which 80% is pre-consumer and 20% is post-consumer recycled material.

MedViron's aluminum height-adjustment column contains up to 90% recycled content.

The overbed table's component parts, the aluminum height adjustment columns and the steel bases, are also recyclable.

MedViron packaging contains an average of 80% recycled content. All cardboard packaging is fully recyclable after delivery and installation.
