

MedViron 34" I-base Overbed Table

MedViron's 34" I-Base Overbed Table's ergonomic design prioritizes both patient comfort and caregiver convenience. The table's height-adjustment mechanism allows for one-handed adjustment to the ideal height, reducing strain on patients and making it easy for caregivers to position the table without excessive bending or lifting. The I-shaped base makes this hospital overbed table compatible with both beds and patient room chairs.

Options: Cupholders, Vanity Mirror or Tablet Holder, Undermount Shelf, Drop-Leaf Extension
